## PROFILE

I recently graduated from University in Accounting and Finance. My dedication to achieving my potential has allowed me to fully master the concepts I learned in University. Now I am highly motivated and eager to apply all that I have learned in a work environment.

## EDUCATION & QUALIFICATIONS

Oxford University - BA Accountancy and Finance

2010

My area of expertise in University was in financial analysis. I am able to think creatively and find new and interesting solutions for existing problems. I'm very interested in problem solving and have learned that every situation is unique and therefore requires a unique solution. I am excited to finally use this skill in the work force.

I have also spent the last few months following my graduation travelling which has been an incredible experience. I have learned a lot about international relations and gained a greater sensitivity to cultural variations and environmental difference. I believe my time travelling helped me in my career to understand global economics in a way I couldn't have from textbooks.

London school of Hospitality and Tourism - International Hotel Management Hotel Accommodation Management

2009

## KEY SKILLS

- Excellent numerical calculation skills. I am very precise and careful and this helps me to complete many calculations accurately and in minimal time.
- I am highly punctual and believe in planning. Creating realistic deadlines for myself helps me to stay organized and accomplish all necessary tasks on time.

## WORK EXPERIENCE

**Customer Service Representative | Britannia International Hotel**

**Sep 2009 to Feb 2012**

Customer Service Representative

- Responsible for guest services including information services, concierge services, conference management, and hosting.
- Organization of conference groups and workshops for up to 400 guests and 20 guest lecturers.
